FAQ

ANTIMICROBIAL FILM

FREQUENTLY ASKED QUESTIONS

How effective is Anti-microbial Laminate?

Anti-microbial Laminate is proven to inhibit the growth of microbes by up to 99%.

Is Anti-microbial Laminate safe?

Yes. It is based on silver ion technology, recognized for centuries with no harmful effects. Anti-microbial Laminate is used in medical, food and graphic arts applications.

What's the difference between antimicrobial and antibacterial?

An antimicrobial inhibits the growth of, or destroys harmful microorganisms such as bacteria, fungi and molds. An antibacterial specifically prevents the growth of bacteria.

Has Anti-microbial Laminate been tested?

Yes, repeatedly. Anti-microbial Laminate is tested to ISO standards. We also undertake ongoing quality control tests and environmental trials.

How long is Anti-microbial Laminate effective for?

Anti-microbial Laminate is effective for the intended lifetime of the product it's added to. It is built-in and doesn't wear off or leach out.

Does Anti-microbial Laminate affect a product in any way?

No. You can't see, smell or even taste Anti-microbial Laminate.

Can a Anti-microbial Laminate-treated polymer be recycled?

Yes, it can be recycled effectively without any complications.
